SUBJECT INDEX

Alkene
Photochemical reactions of Group 6 metal carbonyls in catalytic transformation of alkenes and alkynes 205

Alkyne
Photochemical reactions of Group 6 metal carbonyls in catalytic transformation of alkenes and alkynes 205

Alums
Structure–spectra relationships. Cr(III) phosphorescence as a probe for structural phase transitions in alums 75

Binuclear metal complex
Synthesis and photophysical properties of chiral, binuclear metal complexes 1

Born–Oppenheimer-based perturbation models
Observations implicating vibronic coupling in covalently linked transition metal electron transfer systems 295

Cage effect
Solvent effects as probes of the dynamical factors controlling sub-nanosecond photoprocesses: the case of $W(CO)_5$pyridine 221

Catalyst tailoring
Photochemistry of copper complexes and their environmental aspects 95

Chiral complex
Synthesis and photophysical properties of chiral, binuclear metal complexes 1

Coordination compound
Optical and photoinduced electron transfer in ion pairs of coordination compounds 257

Copper photochemistry
Photochemistry of copper complexes and their environmental aspects 95

Cr(III) phosphorescence
Structure–spectra relationships. Cr(III) phosphorescence as a probe for structural phase transitions in alums 75

Cyanometallates
Photosubstitution and photoredox behaviour of cyanometallates: reaction models 271

D–A complexes
Observations implicating vibronic coupling in covalently linked transition metal electron transfer systems 295

1,3-Diketonate transition-metal chelates
Quenching of triplet states of organic compounds by 1,3-diketonate transition-metal chelates in solution. Energy and/or electron transfer 55

d^6 metal–diimine complexes
Developments in laser selective spectroscopy and photophysics of d^6 metal–(di-imine) complexes 9

Dioxygen
Tailoring of solid state electrical conductivity and optical electron transfer activation of dioxygen in solution through supramolecular charge-transfer interaction in ion pairs 385

Dithiocarbamate complexes
Photochemistry of Fe(III), Fe(IV), Ru(III), Mo(VI), and Ni(IV) dithiocarbamate complexes 121

Dithiolato complexes
Long-lived metal-complex-radicals in photoreactions of *S,S'*-dialkyl and *S,S'*-alkanediyl derivatives of bis(1,2-ethenedithiolato)metal complexes 397

Dithiolene metallate
Tailoring of solid state electrical conductivity and optical electron transfer activation of dioxygen in solution through supramolecular charge-transfer interaction in ion pairs 385

Electron transfer
Quenching of triplet states of organic compounds by 1,3-diketonate transition-metal chelates in solution. Energy and/or electron transfer 55

Emission spectra
The vibronic structure in the emission spectra of some thienylpyridine complexes 407

Energy transfer
Quenching of triplet states of organic compounds by 1,3-diketonate transition-metal chelates in solution. Energy and/or electron transfer 55

Exciplex
Ligand- and metal-centered inorganic exciplexes generated by excited transition metal complexes 41

Excited-state electron-transfer quenching reaction
Effect of solution medium on the rate constants of excited-state electron-transfer quenching reactions of ruthenium(II)-diimine photosensitizers 359

Excited transition metal complexes
Ligand- and metal-centered inorganic exciplexes generated by excited transition metal complexes 41

Ground state parameters
Manifestation of peripheral group effects in photoredox reactions of complexes 195

Group 6 metal carbonyls
Photochemical reactions of Group 6 metal carbonyls in catalytic transformation of alkenes and alkynes 205

Group-8–cyanobridged complex
Light-induced multielectron charge transfer processes occurring in a series of Group-8–platinum cyanobridged complexes 245

Heteroleptic compounds
The vibronic structure in the emission spectra of some thienylpyridine complexes 407
Highly resolved spectra
Low-lying electronic states of $[Rh(bpy)_3]^{3+}$, $[Pt(bpy)_2]^{2+}$, and $[Ru(bpy)_3]^{2+}$. A comparitive study based on highly resolved and time-resolved spectra 325

IPCT optical transitions
Optical and photoinduced electron transfer in ion pairs of coordination compounds 257
IVCT bands
Light-induced multielectron charge transfer processes occurring in a series of Group-8–platinum cyanobridged complexes 245

Laser selective spectroscopy
Developments in laser selective spectroscopy and photophysics of d^6 metal–(di-imine) complexes 9
LCE
Ligand- and metal-centered inorganic exciplexes generated by excited transition metal complexes 41
LMCT
Observations implicating vibronic coupling in covalently linked transition metal electron transfer systems 295

MCE
Ligand- and metal-centered inorganic exciplexes generated by excited transition metal complexes 41
Mercury clusters
Photophysics and photochemistry of mercury complexes 85
Mercury compounds
Photophysics and photochemistry of mercury complexes 85
Metal-centred photoreactions
Solvent-initiated photochemistry of transition metal complexes 235
Metal complex radicals
Long-lived metal-complex-radicals in photoreactions of *S,S'*-dialkyl and *S,S'*-alkanediyl derivatives of bis(1,2-ethenedithiolato)metal complexes 397
MLCT
Observations implicating vibronic coupling in covalently linked transition metal electron transfer systems 295

MLCT character
Low-lying electronic states of $[Rh(bpy)_3]^{3+}$, $[Pt(bpy)_2]^{2+}$, and $[Ru(bpy)_3]^{2+}$. A comparitive study based on highly resolved and time-resolved spectra 325

Nanoheterogeneity
Developments in laser selective spectroscopy and photophysics of d^6 metal–(di-imine) complexes 9

Optical electron transfer
Optical and photoinduced electron transfer in ion pairs of coordination compounds 257
Optically active compound
Synthesis and photophysical properties of chiral, binuclear metal complexes 1
Organometallic
Photochemistry of organometallics: quantum chemistry and photodissociation dynamics 171
Organometallic fragment
Photophysics and photochemistry of mercury complexes 85
Organometallic reaction mechanisms
Photochemistry as a tool for elucidating organometallic reaction mechanisms 135

Peripheral group effects
Manifestation of peripheral group effects in photoredox reactions of complexes 195
Photochemical reactivity
Light-induced multielectron charge transfer processes occurring in a series of Group-8–platinum cyanobridged complexes 245
Photochemistry
Photophysics and photochemistry of mercury complexes 85
Photochemistry of Fe(III), Fe(IV), Ru(III), Mo(VI), and Ni(IV) dithiocarbamate complexes 121
Photochemistry as a tool for elucidating organometallic reaction mechanisms 135
Photodissociation dynamics
Photochemistry of organometallics: quantum chemistry and photodissociation dynamics 171
Photoinduced electron transfer
Optical and photoinduced electron transfer in ion pairs of coordination compounds 257
Inner-sphere reorganization of photo-induced electron transfers on the laser-excitation of ligand-bridged Ru(II)–Rh(III) and Ru(II)–Co(III) compounds 375

Photoisomerization
Photochemical behaviour of metal complexes. Pressure effect versus mechanism 153
Photophysical properties
Synthesis and photophysical properties of chiral, binuclear metal complexes 1
Photophysics
Photophysics and photochemistry of mercury complexes 85
Light-induced multielectron charge transfer processes occurring in a series of Group-8–platinum cyanobridged complexes 245
Photoreactions
Long-lived metal-complex-radicals in photoreactions of *S,S'*-dialkyl and *S,S'*-alkanediyl derivatives of bis(1,2-ethenedithiolato)metal complexes 397
Photoredox behaviour
Photosubstitution and photoredox behaviour of cyanometallates: reaction models 271
Photoredox cycling
Photochemistry of copper complexes and their environmental aspects 95
Photoredox parameters
Manifestation of peripheral group effects in photoredox reactions of complexes 195
Photoredox reaction
Photochemical behaviour of metal complexes. Pressure effect versus mechanism 153
Photoredox reactions of complexes
Manifestation of peripheral group effects in photoredox reactions of complexes 195
Photosubstitution
Photochemical behaviour of metal complexes. Pressure effect versus mechanism 153
Photosubstitution and photoredox behaviour of cyanometallates: reaction models 271
Pollutant
Photochemistry of copper complexes and their environmental aspects 95

Ruthenium(II)-dimine photosensitizers
Effect of solution medium on the rate constants of excited-state electron-transfer quenching reactions of ruthenium(II)-diimine photosensitizers 359

Solvent-initiated photoreactions
Solvent-initiated photochemistry of transition metal complexes 235
Structural phase transitions
Structure–spectra relationships. Cr(III) phosphorescence as a probe for structural phase transitions in alums 75
Sub-nanosecond photoprocesses
Solvent effects as probes of the dynamical factors controlling sub-nanosecond photoprocesses: the case of $W(CO)_5$pyridine 221

Tailoring of electron transfer interaction in ion
Tailoring of solid state electrical conductivity and optical electron transfer activation of dioxygen in solution through supramolecular charge-transfer interaction in ion pairs 385
Thiemylpyridine complexes
The vibronic structure in the emission spectra of some thienylpyridine complexes 407
Time resolved spectra
Low-lying electronic states of $[Rh(bpy)_3]^{3+}$, $[Pt(bpy)_2]^{2+}$, and $[Ru(bpy)_3]^{2+}$. A comparitive study based on highly resolved and time-resolved spectra 325
Transition metal complexes
Photochemical behaviour of metal complexes. Pressure effect versus mechanism 153
Solvent-initiated photochemistry of transition metal complexes 235
Triplet state quenching
Quenching of triplet states of organic compounds by 1,3-diketonate transition-metal chelates in solution. Energy and/or electron transfer 55

Vibromic coupling
Observations implicating vibronic coupling in covalently linked transition metal electron transfer systems 295
